INFO.

- 1. On 12 May 1953, the Noues Deutschland newspaper carried an article entitled "Die Belegschaft eines Ministeriums erzicht ihren Minister" which was extremely critical of Wilhelm Feldrann, Minister for Light Industry. The NDF Parteivorshand, which includes Feldmann as a member, attributed special importance to heis abtack as it went far beyond the usual measure. Although informed quarters believed that the article possibly represented an attempt to find a scapegoat for the failure of the light industry, the NDF Hamptvorstand felt that the attack was primarily directed against Feldmann, who was bland for his bourgeous ideology. SED groups allegedly have long made efforts to recove him from the government.
- 2. Rudi inwarth, another member of the KDP Parteivorstand, stated that the NDP bould probably dissociate from Feldmann as he was unable to make himself agreeable to the close group of government members. He said that this would be more appropriate than another Hamann case for the party. He added that this step would of course we taken only if there were no other possibility left.
